

## BATHY RECORDER™

Nobeltec's Bathy Recorder provides exceptional target and bottom detail, whether you are using it for fishing or safety. Bathy Recorder incorporates sea floor topographic information gathered with your sounder/depth finder device into your 3D display giving you an unparalleled 360° awareness of your environment. Chart detail constantly improves with repeat trips over the same areas making it an invaluable tool for charting your favorite fishing and diving spots.

### Features

- Record your favorite fishing spots using data from your integrated sounder or transducer
- Create custom contours
- Customize sea floor charts
- Incorporate data into your 3D charts

Bathy Recorder Plus Pack is sold separately and requires version 9 or later of Admiral™ or VNS™.

“ I love my Bathy Recorder! I can't imagine trolling salmon without it. The 3D graphics and depth colors are both highly entertaining and informative. If my Bathy Recorder went down I would have no choice but to head back in. - Eric H. ”

“ Using Bathy Recorder is like having an extra crewman on board that remembers every pinnacle and edge. I can confidently run my gear within 18 inches of the bottom. It continues to open up new fishing areas that were inaccessible before - Stephen R. ”
