

Support Discontinuation Notice

Admiral™ 8 & Visual Navigation Suite™ (VNS™) 8

Effective August 31, 2011, Nobeltec will discontinue support for Admiral 8 and VNS 8. As has been Nobeltec's support policy, we will continue to support our current software versions, Admiral 11 and VNS 11, as well as versions 9 and 10, the next two most recent versions. This is not a change to our policy.

With an upgrade to our newest release, you'll receive the most up-to-date navigational software Nobeltec offers and you will have access to C-MAP by Jeppesen MAX Pro cartography.

If you're an Admiral 8 and VNS 8 customer, contact a Nobeltec Dealer or our Nobeltec Sales Team to purchase Nobeltec products including the new Nobeltec TimeZero Trident software, or upgrade to Nobeltec VNS 11 or Admiral 11 software.

For additional Nobeltec product information, visit our website – www.nobeltec.com.

Affected Products

- Admiral version 8
- VNS version 8

Key Date

Customer support for Admiral 8 and VNS 8 will be terminated on August 31, 2011.

See the Nobeltec website for Sales and Technical Support contact information.
